Julie,

[REDACTED] and I just drove all the way home still numb and in shock that we finally got all the way to full emancipation for all four kids, and most importantly, that you guided us there every step of the way.

[REDACTED]

And you gave this family your best every step of the way. Until you, I never knew what true family law representation was...your level of hyper-organization, your unbelievably considerate transparency concerning not racking up unnecessary legal charges, you incredibly professional presentation in the courtroom—clear, concise, professionally appropriate and respectful language, true and detailed knowledge of the case and client you are representing. Never once, in all these years, did you ever scramble, "shoot from the hip", or just go through the motions of legal representation...you are the Real Deal.

But most of all, your hard and unceasing professional work saved children from an emotionally abusive environment, and helped them live an infinitely more stable, secure and nurturing life.

You saved lives, Julie. We will never forget what you did, and we thank God for you always.

With More Gratitude than you will ever know,

[REDACTED]
